THE GARDEN ISLE

This is where Mother Nature comes to relax. As you drive south then west on Kaua'i's Kaumualii Highway from Lihue, you're taking a journey that not only takes you into a realm where dolphins play off the coast and monk seals stop by for a visit, you're taking a journey back in time to a gentler Kaua'i that you probably thought existed only in your imagination.

ASTON WAIMEA PLANTATION COTTAGES

Imagine spending your vacation not just in another place, but another time.

Awaken to a fresh sea breeze blowing in off the Pacific and the sounds of the surf playfully lapping at the nearby shore.

Originally built in the early 1900s, these beautiful Plantation Cottages have been completely restored and updated with modern amenities and conveniences. They are beautifully appointed with period furniture of mahogany, rattan and wicker.

All cottages offer private lanais or generous verandas for relaxing and listening to the rustle of palms in the gentle trade winds. It's a wonderful place to end your day of exploration and let the rest of the world go by.

Sunset Magazine ranked Aston Waimea Plantation Cottages their #1 Romantic Cottage.

And, of course, there's a day spa with massage and salon services, a swimming pool, a restaurant, free WiFi service and a fully equipped kitchen in every cottage with a microwave, coffeemaker and blender.

There are also specialty plantation homes available for larger families and groups.

Take a step back in time, and a step up in peace and comfort.

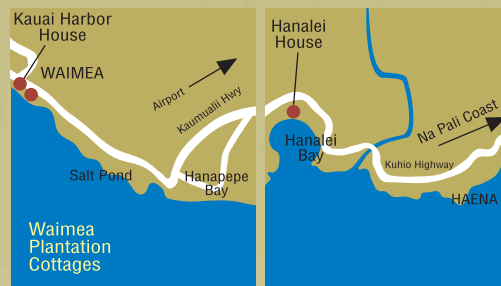

E komo mai! Come visit us!

Ranked #1 Romantic Cottage by Sunset Magazine, Aston Waimea Plantation Cottages offer privacy in a historic setting with modern amenities and conveniences.

Take a step back in time to a gentler more peaceful Kaua'i you thought existed only in your imagination.

"The Garden Isle" is one of America's great treasures. Beautiful stretches of white sand beach and extravagant tropical greenery frame a lush sanctuary that is the least developed of the four major Hawaiian Islands, and one of the most beautiful spots on earth.
